Baja SAE BRAZIL – Northeast Event 2022

Design Finals

Dear Participants,

This informative provides the explanation for the Baja NE Design Finals – Phase 2.

Design Finals

The three teams that achieve the highest scores from the sum of the Phase 1 scores + the Dynamic Evaluation of Design scores will be qualified to the Design Finals.

These teams will be given the opportunity to answer the questions of the judges about an in-depth evaluation of their projects. The vehicle must be together with its teams during the entire design final. The design final judges may ask about any subject related to the project, deliverables, design presentation, management, and budget presentation, and any other project related item even if this item wasn't presented before.

In the event of a tie for third place, both teams will go to the final. The purpose of the design final is to answer the judges' questions, rather than presenting the material used in Phase 1. The team must have members ready to answer any questions from the judges on any subject (can be supported with any materials: written documents, banners and/or notebooks brought by the team). These extra materials may be in any Portuguese or English as required.

Members should be ready to answer questions in English. The total evaluation duration will be 1 hour and 30 minutes.

Project Presentation Finals Score

The scores obtained by all the teams in the topics Design Presentation (DP), Management and Budget Presentation (MBP) and Business Presentation (BP) will be put back into dispute in the Design Finals (maximum of 290 points in total).

The new scores for each topic will be limited by the highest and lowest scores of the qualified teams to the Design Finals. The highest topic score is named (A), the second highest topic score is (B) and the lowest one is (C).

That said, the scores in dispute are:

- DP(A), DP(B) and DP(C) for Design Presentation topic
- MBP(A), MBP(B) and MBP(C) for Management and Budget Presentation topic
- BP(A), BP(B) and BP(C) for Business Presentation topic

The judges will determine the winner team, second and third place of the Design Finals for each one of these topics based on the in-depth evaluation of their projects.

The winner team of the Design Presentation topic in the Design Finals will receive a new score, the DP(A), the second place will receive the score DP(B) and the third place will receive the score DP(C). The winner team of the Management and Budget Presentation topic in the Design Finals will receive the score MBP(A), the second place will receive the score MBP(B) and the third place will receive the score MBP(C). The winner team of the Business Presentation topic in the Design Finals will receive the score BP(A), the second place will receive the score BP(B) and the third place will receive the score BP(C).
